

WHALETIMES POSTCARDS FROM THE DEEPEND!

Deep-Pelagic Nekton Dynamics of the Gulf of Mexico 2015

Photo copyright April Cook. Used with Permission.

Hello from the DEEPEND! I'm Tracey Sutton. I'm an Associate Professor at the Oceanographic Center of Nova Southeastern and a biological oceanographer. I'm also the Director of the DEEPEND Consortium. For DEEPEND cruises, I'm also a fish guy...sampling and identifying deep-pelagic fish in the Gulf of Mexico. "Deep pelagic" is science-speak for the deep waters in the middle of the ocean, far from land. Our DEEPEND cruises and research will be amazing!

More to come.
Tracey
