

Creep into the DEEPEND™

KRIS CLARK

UNIVERSITY OF SOUTH FLORIDA
ST. PETERSBURG

STUDIES:

Biological Oceanography, focusing on molluscs and cephalopods.

DEEPEND FOCUS:

Identification and vertical distribution of heteropods.

HAS STUDIED:

I have studied molluscs and cephalopods in the lab and out in the field. I have also studied dolphins from small craft boats in the Gulf of Mexico.

SOMETHING SURPRISING ABOUT KRIS:

I have two Boston Terriers named Beauregard and Louis!

THREE THINGS KRIS DOES TO HELP THE EARTH:

To live as “green” as I can I: 1. Recycle everything that can be recycled and reduce my garbage footprint, 2. Wear natural fiber clothing and not man-made fabrics (Did you know dryer lint from man-made fabrics eventually ends up in the oceans and in the belly’s of fish and wildlife!), and 3. Use light colored paints and materials on my house to use less energy to cool my hot Florida home.
